It converts the video fine, but the sound is all messed up I don't see what else I can do any different within the program to correct this.. But no one will be able to view these movies in this format (we don't have bluray) How can I convert the avchd files? I'm a novice at this and so far the research I've been coming up with is confusing to me.. It's a bit choppy so I plan to fool with the setting some more to see if I can work through that.. In any case, if it does all this I'll be buying it Thanks so much Thanks for this information.. I have to look into Pinnacle next to see if that converts It would be nice if it did because I think I might be able to edit movies with this program (but am a tad unsure).. I really appreciate all the info and guidance provided here This was all new to me and this forum has been wonderful. cea114251b [Mac El Capitan Download](#)
